Perfect, just wanted to make sure we weren't missing files in the GSDT somehow on our end.

If it keeps giving you problems, feel free to reach out to Dan again. Anything we can do to help, let me know!

Have a great weekend!

Brandon

Subject: RE: GSDT File upload issues

Hi Brandon, we have I believe 4 more files to upload and then we will be able to make submissions for all of the modules in the GSDT and the CBI shared folder will be fully populated. Say I am having issues with the Rock Properties Tab in the AoR and CA module, for some reason the only file it won't let me upload is the Porosity determination. Its funny because it is sourced in the same folder as all of the other files I've been successfully able to upload.

Anyhow I'll keep trying.

Many thanks

-Nick

Awesome, good to hear!

So have you submitted all files to the GSDT? I checked yesterday afternoon, and Ken checked this morning, and we don't see anything yet. I do see everything in the OneDrive folder, so just wanted to check.

Thanks!
Brandon

Hi Brandon, sorry for not circling back, but yes the issue is resolved, not sure what was going on, I went in and was able to upload into different module and then came back and tried again it worked!

Many thanks

Nick –

Just wondering if you were ever able to get the GSDT upload issue fixed by Headquarters? I see files uploaded to the OneDrive folder, but still nothing in the GSDT yet, so I was just curious if they were still working on it.

Hi Dan, thanks for the quick response. Just so you know I've tried with various versions of the file name, one with no spaces for example and also have tried various file locations from my desktop and directly from the C: drive. I have been able to upload files in other modules and it seems that right now the issue is with the Pre Ops Testing Plan upload in Module D.

Many thanks

 You don't often get email from feuer.daniel@epa.gov. [Learn why this is important](#)

The issue might be the characters in the filename. Can you try replacing the underscores with dashes and see if that fixes the problem? If not, please let me know and I'll have our IT investigate further.

In the future, to receive the fastest GSDT support, please e-mail GSDDataTool@epa.gov

I'm brand new to the Class VI world and the GSDT, but I've been told that since it's the GSDT, I'm probably not going to be able to help you out much. I'm adding Dan Feuer with HQ to this email. He works with the GSDT contractor, so he might be able to help you better than I can, or perhaps he can reach out to the contractor for assistance.

Apologies for not being very helpful! I'm definitely interested in knowing what the issue/resolution is in case anyone else comes across this error.

Thoughts or suggestions, Dan?

Hi Brandon, thanks for getting back to me. Yea I am unable to upload any documents, I've been working in Module D "Pre-Operational Testing" and I keep getting the same error message.

Many thanks

Nick –

Just checking to see if the GSDT is still being difficult and not letting you upload attachments? If so, let me know and I'll see if I can help.

Subject: GSDT File upload issues

Hi Ken, good morning. I am beginning to upload files into the GSDT for LA-0005 and keep getting a file upload failure message, see attached screen shot.

Here is an example of a file and path name that I am using, note the file is only 778 KB in size. I am trying to upload this into Module D "Pre-Operational Testing"
C:\GSDT_Files\Pre_Ops_Plan_6_14_2022.pdf

Any help you can provide will be greatly appreciated.

Many thanks

-Nick
